Panmedia.Artist – a user profile management module for Orchard V1.10

This module was developed as part of the artist community site http://sang-skriver.dk – a web site dedicated to the largest songwriter's association in Northern Europe, Aarhus Sangskriverværksted.

The source code for this module is available on GitHub: https://github.com/finnvs/Panmedia.Artist

I have 'borrowed' part of the source code from other profile management modules for Orchard in the Module Repo and on GitHub, and have added a few extra bells and whistles, such as a profile picture upload page with javascript crop and rotate functionality, which uses Azure Blob Storage to persist the user's picture on the backend.

Screenshots:

1) User (Bruger) menu, shown here when the user is logged in and already has a profile on the web site.

2) User Profile display page. By default, only a few select information fields are shown from the user's profile.
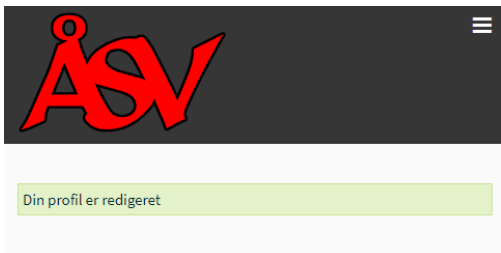

Telefon synlig for:

Hjemmeside

http://www.panmedia.dk

Profiltekst

Singer-songwriter tingen .. :-)

3) Edit profile page – text fields, and a radio button selector for 'show phone number and email' on site.

Din profil er redigeret

Upload et profilbillede

Vælg fil Der er ikke valgt nogen fil

Luk vindue

4) Upload profile picture – set in a separate page from the general profile info, as this process can be error prone on some machines.

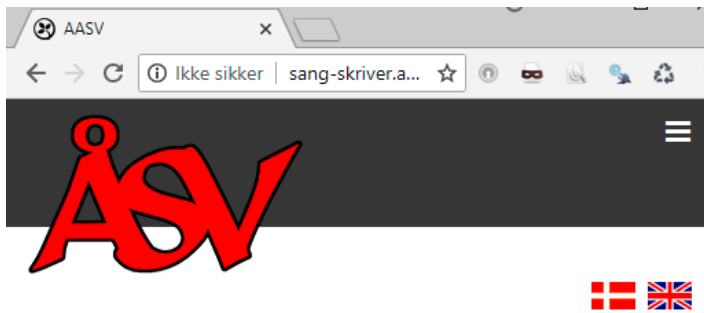

Upload et profilbillede

Save Avatar Rotate 90+ Rotate 90- Rotate 180

Cancel Rotate

5) Client side crop and rotate functionality for the uploaded picture, before it is saved to Azure Blob Storage.

AASV Profiler:

Lars Graulund
Ole Holmgaard
Misha Hoekstra
Kamille Lindholm
Allan Folmer
Finn Langgaard
Berit Hammershøy
Peter Værnholt
Dietmar Berkner
Kristian Mikkelsen
Lars Skou
Jan Skambraks
Lars Ingesman
Svend Seegert
John Bæk

(1)(2)(3)(4)(...)(>)(>>)

6) The module includes a paginated display page with links to user profiles. The info shown on the individual profiles can be customized by the end user.
